

Join us for a talk and discussion
about small termites and big ideas
with award-winning science journalist

LISA MARGONELLI

on her new book
*Underbug: An Obsessive Tale of
Termites and Technology*

"Mesmerizing ... This isn't just a brilliant book about bugs. For almost a decade, Margonelli scrutinized the scientists and their work with the same forensic gaze they themselves applied to the insects. The result is a rare longitudinal insight into the slippery nature of scientific progress." -- The New York Times
